SW DEV AUG17

ACTIONS LAST WEEK

- Event Sourcing Full Implementation [DONE]

- API execution on Ethereum [DONE on DEV]

- BugMark Documentation and Cleanup [NOT DONE]

ACTIONS NEXT WEEK

- Deploy Integrated Ethereum/Rails to Production

- Plan for High-Impact London Demo (pending team approval)

EVENT SOURCING: WHY?

- Ethereum dev tools: not so great

- Leverage proven tools: seamless migration

- Radically improve development speed

- Auditable private chains

- Enduring, trainable development process

DISCUSSION: WHERE TO FOCUS NEXT?

- Implement next-gen contracts

- Pursue an ICO or some such

- Find a foundation customer

- Prepare a killer demo for London

- etc.

LONDON DEMO

- Two months away!!!

- Define target application and user group

- Build App: docco, UI, marketing assets, …

- Etc.
